
Product discontinuation of Mundus series

Dear business partners,

We would like to inform you about the discontinuation of the product series "Mundus". The reason for the discontinuation are discontinued components of suppliers.

We recommend our Xcomand 2 as replacement product. This is functionally equivalent to the discontinued Mundus. Ratia 73 weld timer modules from firmware version 5.10 or 6.07 with Ethernet interface rare compatible with Xcomand 2. Older versions of Ratia 73 can be retrofitted with the HWC ETH Ethernet interface converter.

Xcomand2 is established operation of Ratia and Genius systems on the welding machines and gun systems. Graphical programming provides a very quick overview of the welding process. With Xcomand2 performance is increased once thanks to faster communication to the weld timer. An even faster processor is used in Xcomand 2, so that operation becomes even more fluent. Its coloured touch display is available in 12 inch and 15 inch sizes.

Our material availability allows you to maintain (service/repair/maintenance) your Mundus for a period of ten years.

Concerns the following products:

Product number	Product description	Product type
27233	Mundus-ALPHA	Hardware
25973	Mundus-BETA	Hardware

substitute products:

Product number	Product description	Product type
42220	Xcomand2 15" with power supply	Hardware
42219	Xcomand2 12" with power supply	Hardware
41315	Xcomand2 15" without power supply	Hardware
41314	Xcomand2 12" without power supply	Hardware

validity:

Valid from

31.12.2019

If you have any further questions, please contact your local agent or our service department by e-mail at Service@Harms-wende.de or by telephone at +49 40 76 69 04-84.

Yours sincerely
